

I benefit from listening to XM Satellite Radio. Satellite radio provides variety and commercial-free quality that are not available by any of our local stations. In being a subscriber to satellite radio, I am paying for these services and it should not be up to the National Association of Broadcasters to dictate what I can and cannot hear. Specifically the 24 hour local weather and traffic stations (which are not constantly available via any public radio station in the area)

I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I pay for.
